Proudly NZ made for over 40 years, Melteca® panels offer you the perfect solution for creating exceptional interior spaces.

We're inspired by international trends and local lifestyles so you can trust that our highly durable, low maintenance and easy to clean range of decorative panels are the ideal choice.

For use at home or at work, Melteca® covers the design spectrum. It's available in a wide variety of colours and finishes, crafted to work across a range of interior applications like cabinetry and shelving, through to commercial furniture and wall linings.

Melteca® - made for living.

We all want to do the right thing when it comes to the environment. New Zealand made, responsibly sourced, and low emission; you've made a good choice with Melteca®.

Melteca® is an excellent example of a high quality product focused on successfully reducing and reusing resources to minimise our impact on our natural environment.

Melteca® has been awarded the Eco Choice Aotearoa certification, formerly Environmental Choice New Zealand. This is an independently run ecolabel owned by the Ministry for the Environment, distinguishing the greenest products in the New Zealand market.

Melteca® is made in New Zealand at our Hamilton manufacturing plant following the best international environmental practices, and holding an enviable array of third party certifications for both the product itself and the way it is made. All particleboard and MDF* used in Melteca® boards has Eco Choice Aotearoa certification with the wood used coming from New Zealand forests. In addition all MDF* used in Melteca® board has achieved FSC® certification, ensuring the wood comes from responsibly managed forests. Melteca® is low in formaldehyde emission, especially on Lakepine MDF (E0).

*excludes Fire Rated MDF

Third party certifications provide transparency and assurance that you are choosing quality laminated panels which meet or often surpass rigorous industry testing and standards. Melteca® also supports the New Zealand Green Building Council's Green Star and Homestar tools. Green Star is a rating system for the design, construction and operation of buildings, fitouts and communities; while Homestar measures the health, warmth and efficiency of New Zealand homes.

This all means you can bring your design ideas to life, confident in the knowledge the surfaces you have chosen have been made with a sustainable future in mind.

Eco Choice Aotearoa applies to the Melteca® Standard range pressed on particleboard or MDF or MRMDF (excluding FR).

FSC® applies to the Melteca® Standard range pressed on MDF or MRMDF (excluding FR).

Our products

Standard range

Melteca® quality decorated panels are market leading low pressure laminate.

Melteca® offers an extensive range of colours giving you variety and choice. The high durability and easy clean nature of the melamine surface makes Melteca® ideal for your residential and commercial projects.

Hi-Gloss range

Add the stunning look of gloss and a touch of luxury to your space with Melteca® Hi-Gloss.

Melteca® Hi-Gloss is a more durable alternative to lacquer. Melteca® Hi-Gloss is also suitable for any vertical surface where the maximum smoothness and reflectance of a gloss surface is important.

Jumbo range

Our Jumbo Sheets colour range takes the hard work out of colour schemes for commercial spaces.

The simple palette reflects current trends, combining prints and solids that are easy to mix and match. Colours come in a large sized decorated board (1830mm width).

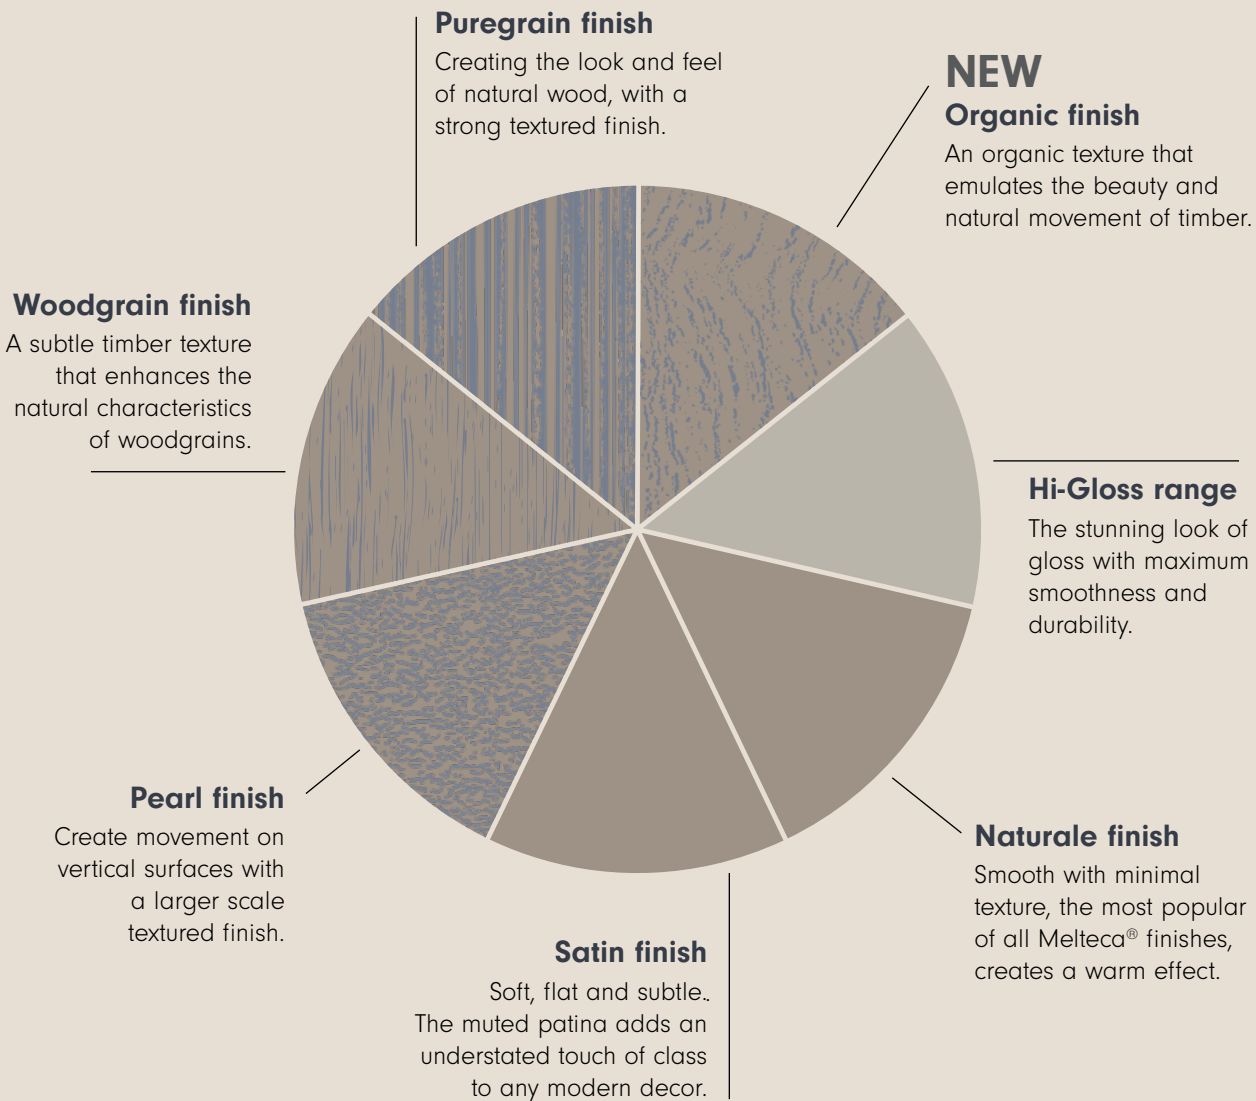

Fire retardant for wall linings

The Standard Melteca® range can be specified on a fire retardant substrate giving it a Group 1S fire rating and making it suitable for wall linings where maximum fire resistance is important.

Finishes

For good looks that you can feel as well as see, the finishes are just the start!

Melteca® is available in a number of finishes, allowing you to add another dimension to your space, through both visual and tactile sensations. The Standard colour range is available in Naturale, Satin, Pearl, Organic, Puregrain and Woodgrain finishes. For an added touch of luxury the Hi-Gloss range will add a shine to a selected number of décors.

The organic texture emulates the beauty and natural movement of timber.

Featuring a matte finish with varying depths in the texture on a highly durable surface. Timeless realism at a fraction of the cost of real timber that suits any style.

Insert Melteca® Snowdrift Organic

Edging

Matching edgetape is offered across the whole Melteca® range. For more information on our edging offer check out the Melteca® Availability Guide on laminex.co.nz

Melteca® is no different from any other material in that darker colours and gloss finishes will always show scratches and superficial wear and tear more readily than lighter colours or lower gloss finishes. Such surfaces require more care and maintenance.

Woodgrain Collection

Colours, textures and grains inspired by nature to create natural and tangible connections in interior spaces.

Jumbo Collection

Colours come in a large sized decorated board (1830mm width), perfect for commercial use.

How it's made

STANDARD

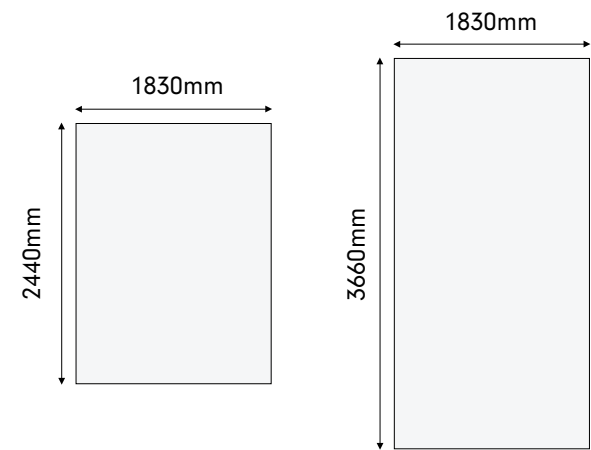

Melteca® laminated panels consist of a tough melamine paper laminated to a substrate – either particleboard, MDF, MR E0 MDF or FRMDF.

Jumbo sheets

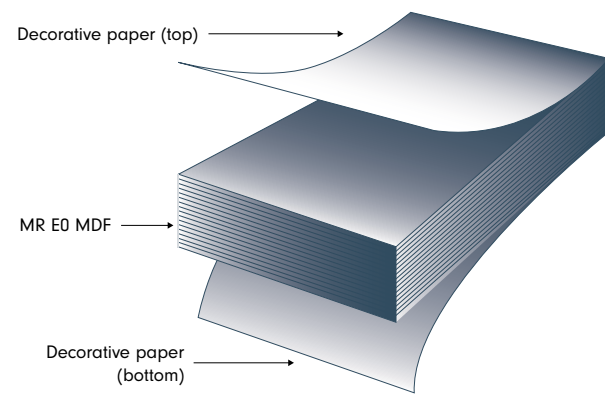

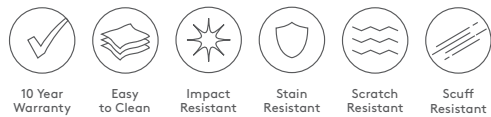

Jumbo sheet colours come in a large sized decorated board (1830mm width) perfect for commercial use and pressed on MDF.

Available Jumbo Sheet size:
1830 x 2440mm
1830 x 3660mm

HI-GLOSS

Melteca® Hi-Gloss panels are manufactured on a durable MR E0 MDF substrate giving it the ideal platform to be finished with a higher gloss level when pressing.

Fire rating

FIRE TEST CLASSIFICATIONS

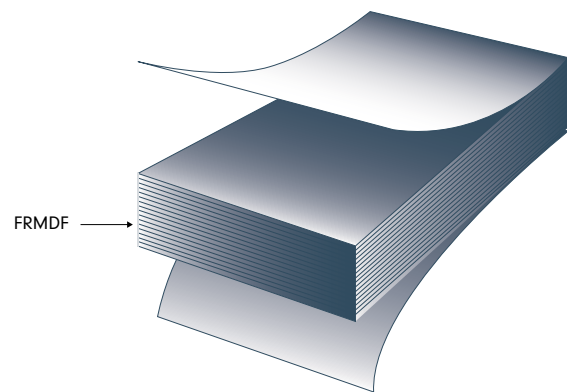

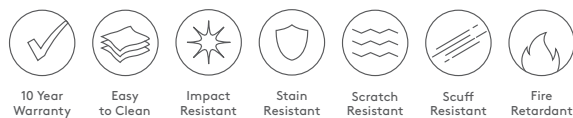

Cone Calorimeter test in accordance with ISO5660 and New Zealand Building Code Verification Method C/VM2 Appendix A.

The tests were carried out and data recorded according to the test procedure described in ISO 5660: (2002), Reaction-to-fire tests - Heat release, smoke production and mass loss - Part 1: Heat release rate, and Part 2: Smoke production rate.

Melteca® Product	Group Classification	Fire Test Report
Standard	3	FH 5026
Standard Fire Retardant substrate	1S	FH 5030

FIRE RETARDANT MELTECA® WALL LININGS

If pressed on FRMDF Melteca® returns a group 1S fire rating in accordance with the New Zealand Building Code Verification Method C/VM2 Appendix A.

The colours of the photographs and swatches depicted in this brochure are as close to the Melteca® range as modern photographic, lighting and printing processes allow. The colour/finish combinations shown are available at the time of publication, but are subject to availability and may be withdrawn at any time. Melteca® is no different from any other material in that darker colours and gloss finishes will always show scratches and superficial wear and tear more readily than lighter colours or lower gloss finishes. Such surfaces require more care and maintenance and Laminex New Zealand® recommends the use of laminate cleaning products (or mild household cleaning products). Please visit our website, laminex.co.nz, for specific care and cleaning information. Note that in certain lights or from different angles wipe down marks may be visible after cleaning. Melteca® should be protected from strong direct sunlight as continuous exposure may cause discolouration or fading to the surface over time. When ordering a decor for one job we recommend using the same sheet size (i.e. all 1220mm wide or 1830mm wide) due to the slight colour variances that can occur between different paper runs. Please obtain a copy of the terms and conditions of the Melteca® 10 Year Limited Warranty from Laminex New Zealand® or visit laminex.co.nz. This warranty is in addition to any rights that may exist under the Consumer Guarantees Act (1993). J010924 3/10/2023
